CAREER OBJECTIVE:

SAP Basis Administrator with 3.7 years of experience in managing and supporting SAP landscapes across Production and Non-Production environments. Skilled in system monitoring, SSL certificate renewals, kernel upgrades, transport management, and system refresh activities. Experienced in SAP S/4HANA, SAP BW/4HANA, SAP Solution Manager, and SAP Web Dispatcher, with proven ability to troubleshoot complex issues and ensure high system availability. Adept at implementing SAP Notes, handling ChaRM transports, and managing OSS connections with precision. Strong communicator with a problem-solving mindset and proactive approach, consistently delivering secure, stable, and efficient SAP environments.

WORK EXPERIENCE:

<u>Project</u>	Boeing AMAas Maintenance (SAP)
	Avent

Professional Experience

SAP Basis Administrator | HCLTech, Chennai | Nov 2023 – Dec 2024

Project: Boeing AMAas Maintenance (SAP)

- Monitored all servers and systems to ensure availability and performance.
- Performed SSL certificate renewals and SAP service password reconciliation for enhanced security.
- Restarted systems using SAP MMC during maintenance activities.
- Prepared and uploaded daily monitoring reports for Prod and Non-Prod systems to SharePoint.
- Actively monitored mailbox and responded to high-priority emails to maintain smooth operations.

Software Engineer | HCLTech, Chennai | Dec 2024 – Present

Project: Avent | AMS Support

- Administered SAP landscapes including SAP S/4HANA, SAP BW/4HANA, SAP SCM, SAP Web Dispatcher, SAP BOBJ, and SAP BODS.

- Performed end-to-end SAP Basis administration, including system start/stop, profile parameter changes, and kernel upgrades.
- Implemented SAP Notes (S-Notes), including SAP Security and hot news notes.
- Handled transport management (ChaRM and OS-level imports) and OSS connection management.
- Conducted dump analysis, tRFC/qRFC error resolution, and printer configuration.
- Executed system refresh activities and client administration (local/remote client copy, export/import).
- Delivered daily monitoring reports and ensured proactive issue resolution.
- Performed BODS & BOBJ restart activities and Vertex user creation.
